

MIŠELAN

Lepak za hvatanje miševa, pacova
i insekata

Mišelan je lepak na bazi poliizobutilena.

Tehničke karakteristike

Izgled: prozirna viskozna masa
Rok trajanja: neograničen

Namena

Mišelan je vrlo efikasan lepak namenjen za hvatanje miševa, pacova, insekata, buba, stršljena itd.

Uputstvo za upotrebu

Lepak se nanosi na parče drveta, kartona ili druge podloge. Dugo zadržava lepljivost i ne suši se. Nanošenjem oko stabla drveta omogućava efikasnu zaštitu protiv insekata koja gmižu sa tla. Ukoliko je neophodno lepak se može očistiti benzinom.

Napomena

Lepak je otporan na vodu i vlagu i potpuno je bezbedan za upotrebu jer ne sadrži otrovne materije i nije zapaljiv.

Način isporuke

Lepak se isporučuje u tubama od 135 g.

Skladištenje

Lepak čuvati u dobro zatvorenoj ambalaži, na suvom mestu na temperaturi od +5°C do +25°C

MISHELAN

Glue trap for mice, rats, and insects

Mishelan is glue based on poly isobutylene.

Technical characteristics

Appearance:	transparent viscous matter
Shelf life	unlimited

Application

Mishelan is highly efficient glue trap for mice, rats, insects, bugs, hornets, etc.

Instructions for use

Apply the glue on peace of wood, cardboard, or other appropriate surface. It stays sticky for a long time and it doesn't get dry. Applying around the tree trunk you get the efficient protection against insects. If it is necessary, you can clean the glue with gasoline.

Note

The glue is water and moist resistant and it is completely safe for usage, it doesn't contain hazardous matters and it isn't flammable.

Packing

The glue is delivered in 135 g tubes.

Storage

Keep the glue in well closed tubes in dry place at temperatures +5°C to +25°C
