

SINTEX 7033/E

Trajno plastična zaptivna masa

Sintex 7033/E je trajno plastična vodootporana zaptivna masa. Koristi se u metalnoj, građevinskoj i automobilskoj industriji za zaptivanje metalnih, drvenih i plastičnih delova, a u cilju sprečavanja prodiranja vode, prašine i vazduha.

Tehničke karakteristike

Boja:	bela, po želji kupca
Specifična masa:	$\approx 1,50 \text{ g/cm}^3$
Suva masa:	99%
Otpornost na vodu:	otporna
Otpornost na organ.rast.	neotporna
Stvrdnjavanje:	ne otvrdnjava

Uputstvo za upotrebu

Površine na koje se primenjuju zaptivne trake moraju biti čiste, suve, bez prašine, masti i ulja. Da bi se postigao odgovarajući efekat zaptivanja dovoljan je pritisak ruke.

Pakovanje

Sintex 7033/E se isporučuje u trakama na foliji dimenzije 10 x 2 x 1000 mm

Skladištenje

Čuvati na suvom i hladnom prostoru.

Rok upotrebe

Neograničen

Ne podleže SRPS-u

SINTEX 7033/E

Permanent plastic sealant

Sintex 7033/E is permanently plastic, water resistant sealant. It is used in automotive industry, construction industry and metal industry for sealing metal, wooden and plastic parts, to prevent penetrating water, dust and wind.

Technical characteristics

Colour:	white, or according to customer demand
Specific weight:	≈ 1.50g/cm ³
Dry part:	99%
Water resistance	water resistant
Organic solvents solubility:	Non-resistant
Hardening:	it doesn't harden

Instruction for use:

Apply manually on dry, degreased and clean surfaces. To get proper effect of adhesion, it is recommended to press with hands and fingers.

Packaging

Sintex 7033/E is delivered in form of sealing tapes dimensions 10 x 2 x 1000 mm

Storage

Store in dry and cool place

Expiration date

Expiration date is unlimited.

Note

It does not apply to SRPS
